WORK EXPERIENCE

RapptrLabs

Software Engineer
June 2019 - current

- Built the custom CMS for the first version of an iOS app with over 1,000 monthly active users and a 4.8 rating on the Apple store using React, Redux, and Firebase
- The CMS handles all content for the visually-driven app from MP4s to Lottie animations and creates dynamic images for all uploaded content
- Created a webviewer that simulates the iOS experience on a browser leading to quick product iterations and a 15% conversion rate for iOS/Mac users
- Created a web app MVP for a store delivery management platform with 100+ business customers to create, manage, and monitor deliveries using React and Redux
- Developed a mobile app for the delivery drivers of this platform with turn-by-turn navigation that allows drivers to track and mark deliveries as complete
- Added new features to a meditation app with 10,000+ monthly active users to enable the uploading of audio and video content using React and Redux
